

PostgreSQL EXCEPT Operator

```
dvdrental/postgres@PostgreSQL ▾
Query Editor Query History Explain Messages
1 --The following illustrates the syntax of the EXCEPT operator.
2 SELECT select_list
3 FROM A
4 EXCEPT
5 SELECT select_list
6 FROM B;
```

```
dvdrental/postgres@PostgreSQL ▾
Query Editor Query History Explain Messages
1 --The following statement uses the EXCEPT operator to find the top-rated films that are not popular:
2
3 SELECT * FROM topRatedFilms
4 EXCEPT
5 SELECT * FROM mostPopularFilms;
```

Data Output Notifications

	title character varying	release_year smallint
1	The Shawshank Redemption	1994
2	12 Angry Men	1957

```

Query Editor Query History Explain Messages
1 --The following statement uses the ORDER BY clause in the query to sort result sets returned by the EXCEPT operator:
2
3 SELECT * FROM topRatedFilms
4 EXCEPT
5 SELECT * FROM mostPopularFilms
6 ORDER BY title;
```

Data Output Notifications

	title character varying	release_year smallint
1	12 Angry Men	1957
2	The Shawshank Redemption	1994
