

PostgreSQL ROLLUP

```
1  --The following illustrates the syntax of the PostgreSQL ROLLUP:
2
3  SELECT
4      c1,
5      c2,
6      c3,
7      aggregate(c4)
8  FROM
9      table_name
10 GROUP BY
11     ROLLUP (c1, c2, c3);
```

```
1  --If you haven't create the sales table, you can use the following script:
2
3  DROP TABLE IF EXISTS sales;
4  CREATE TABLE sales (
5      brand VARCHAR NOT NULL,
6      segment VARCHAR NOT NULL,
7      quantity INT NOT NULL,
8      PRIMARY KEY (brand, segment)
9  );
10
11 INSERT INTO sales (brand, segment, quantity)
12 VALUES
13     ('ABC', 'Premium', 100),
14     ('ABC', 'Basic', 200),
15     ('XYZ', 'Premium', 100),
16     ('XYZ', 'Basic', 300);
```

```
1  --The following query uses the ROLLUP clause to find the number of
2  --products sold by brand (subtotal) and by all brands and segments (total).
3
4  SELECT
5      brand,
6      segment,
7      SUM (quantity)
8  FROM
9      sales
10 GROUP BY
11     ROLLUP (brand, segment)
12 ORDER BY
13     brand,
14     segment;
```

Data Output

| | brand [PK] character varying | segment [PK] character varying | sum bigint |
|---|---------------------------------|-----------------------------------|---------------|
| 1 | ABC | Basic | 200 |
| 2 | ABC | Premium | 100 |
| 3 | ABC | [null] | 300 |
| 4 | XYZ | Basic | 300 |
| 5 | XYZ | Premium | 100 |
| 6 | XYZ | [null] | 400 |
| 7 | [null] | [null] | 700 |

```

1  --If you change the order of brand and segment, the result will be different as follows:
2
3  SELECT
4      segment,
5      brand,
6      SUM (quantity)
7  FROM
8      sales
9  GROUP BY
10     ROLLUP (segment, brand)
11 ORDER BY
12     segment,
13     brand;
14
15

```

Data Output

| | segment [PK] character varying | brand [PK] character varying | sum bigint |
|---|-----------------------------------|---------------------------------|---------------|
| 1 | Basic | ABC | 200 |
| 2 | Basic | XYZ | 300 |
| 3 | Basic | [null] | 500 |
| 4 | Premium | ABC | 100 |
| 5 | Premium | XYZ | 100 |
| 6 | Premium | [null] | 200 |
| 7 | [null] | [null] | 700 |

```

1  --In this case, the hierarchy is the segment > brand.
2  --The following statement performs a partial roll-up:
3
4  SELECT
5      segment,
6      brand,
7      SUM (quantity)
8  FROM
9      sales
10 GROUP BY
11     segment,
12     ROLLUP (brand)
13 ORDER BY
14     segment,
15     brand;

```

Data Output

| | segment [PK] character varying | brand [PK] character varying | sum bigint |
|---|-----------------------------------|---------------------------------|---------------|
| 1 | Basic | ABC | 200 |
| 2 | Basic | XYZ | 300 |
| 3 | Basic | [null] | 500 |
| 4 | Premium | ABC | 100 |
| 5 | Premium | XYZ | 100 |
| 6 | Premium | [null] | 200 |

Query Editor Query History Explain Messages Notifications

```

1  --The following statement finds the number of rental per day, month, and year by using the ROLLUP:
2
3  SELECT
4      EXTRACT (YEAR FROM rental_date) y,
5      EXTRACT (MONTH FROM rental_date) m,
6      EXTRACT (DAY FROM rental_date) d,
7      COUNT (rental_id)
8  FROM
9      rental
10 GROUP BY
11     ROLLUP (
12         EXTRACT (YEAR FROM rental_date),
13         EXTRACT (MONTH FROM rental_date),
14         EXTRACT (DAY FROM rental_date)
15     );

```

Data Output

| | y double precision | m double precision | d double precision | count bigint |
|---|-----------------------|-----------------------|-----------------------|-----------------|
| 1 | 2005 | | 5 | 24 |
| 2 | 2005 | | 5 | 25 |
| 3 | 2005 | | 5 | 26 |
| 4 | 2005 | | 5 | 27 |
| 5 | 2005 | | 5 | 28 |
| 6 | 2005 | | 5 | 29 |
| 7 | 2005 | | 5 | 30 |
